

## FARM MAP REQUIREMENTS

It is imperative to supply a detailed map of the proposed treatment area to ensure accurate placement of product.

- All our mapping is carried out on Google Pro. If possible, a KMZ or KML file outlining the exact area with powerlines & other obstacles clearly marked should be emailed to our office prior to job application. (*see example below*)
- If possible road references are essential (for ground crew)
- A north pointing arrow on your map is required.
- All Environmental considerations need to be clearly marked and detailed on maps.
- Mark out land use and crop types on all sides of the treatment area.(including neighbours crops)

### EXAMPLE OF A KMZ FILE RECEIVED & DOWNLOADED ONTO GOOGLE PRO
